---

The goal of this lecture is to demonstrate new and approved techniques and innovative solutions in the modern orthodontics and to show its possibilities and limits. Diagnosis and therapy are explained with theoretical basics and treatment cases. Special focus is put on the teamwork of different disciplines like periodontology and surgery and on the consideration of the TMJ.

### **Anchoring:**

Management and solutions for difficult anchoring situations (using TAD's, SUS). Tips and tricks for easy handling of TAD's (Anchoring-Pins).

### **Non-compliance:**

- Management and solutions for patients with bad cooperation / oral hygiene.
- Indirect bonding, a simplified and quick method, especially for patients with hyper salivation or Hyper active patient (ADHD)

### **Surgery:**

- **Management** of root resorption, impacted teeth, teeth ankylosis, traumatic frontal tooth loss and premature molars-loss.
- **Pre-implants** Orthodontic management in cases of multiple teeth aplasia.
- **Progressive bite jumping** to avoid dysgnathic surgery in moderate Adult cases.
- **Prevention** and management of complications within dysgnathic surgery

### **TMJ:**

Prevention and management of TMD in orthodontics (AquaSplint Concept).

### **Aesthetics:**

Overcoming of treatment-obstacles in aesthetic aspects. Especially with adults and with the help of aligners/Invisalign/Essix etc., lingual systems, TAD'S (as a head gear substitute).

- Up to date - Information about new materials, brackets (especially **self-ligating brackets** as well as new techniques of modern orthodontics)
- Up to date - Information about the Digital orthodontic / intra oral scanners.

### **Relapse:**

Tips and tricks to avoid and treat relapse.
